FARM POULTRY

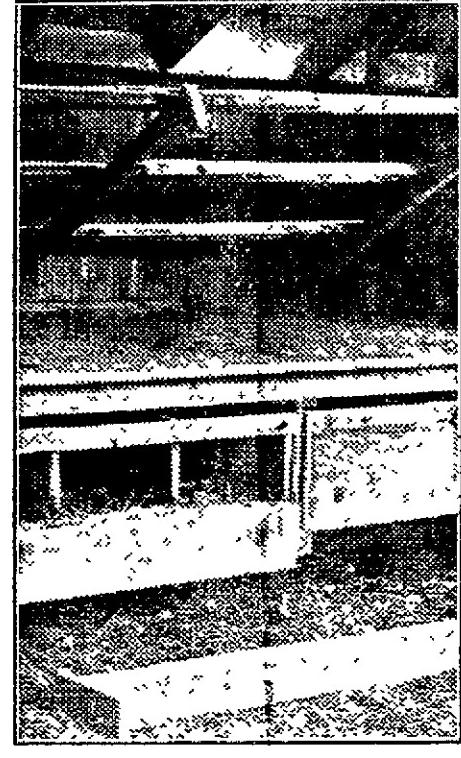

CARE FOR HEALTH OF FOWLS

Dropping Boards Should Be Cleaned Weekly—Isolate Birds With Colds—Keep Away Insects.

(Prepared by the United States Department of Agriculture.)

Clean the dropping boards at least once a week, and spray the roosts once a month with kerosene or some commercial preparation for killing mites. Have a good supply of sand or dry dirt on hand to use on the dropping boards.

If any of the birds develop colds,

A Clean House Promotes the Health of Poultry.

put as much potassium permanganate as will remain on the surface of a dime into a gallon of water and keep this material in their drinking water for several days, or until the symptoms of the colds have disappeared. Remove any sick birds from the flock as soon as noted and treat them in coops by themselves or kill and bury them if they are not worth treating.

Examine the pullets and hens for lice and dust thoroughly with a good insect powder or apply a mixture of equal parts of vaseline and mercurial or blue ointment, applying a piece about the size of a pea one inch below the vent of the bird, rubbing the mixture lightly on the skin. An application of this ointment two or three times a year will keep the fowls free from lice. Where insect powder is used, it should be applied three or four times a year, or oftener if the fowls become infested with lice. Provide a small box in the house, partly filled with dry road dust or fine dirt, in which the hens may dust themselves, thus helping to keep them free from lice.

POULTRY NOTES

It is an easy matter to overfeed fowls. Bear this in mind unless the fowls are on range.

Hens that are laying are not likely to accumulate fat; it is when they are not laying that they do so.

Give the fowls good dust and plenty of it. This is how they keep themselves free of vermin and well.

Hens of light breeds may be profitably kept for three seasons; those of the heavy breeds for two seasons.

Good layers are bred up and not fed up. All the feeding in the world cannot induce a naturally nonproductive hen to change her nature.

A trap nest is the one accurate way to tell whether you are keeping a paying flock, but the poultryman who keeps it must look after the nest in a proper way.

If you have made a failure of everything else, don't think the chicken business will prove to be a life saver. It requires not only brains, but an overplus of energy.

Chickens never wash, as many other birds do but cleanse themselves of insects by wallowing in soil. For this reason every poultry house should be provided with a dust box.

Five eggs out of every 100 are spoiled by being fertile. Producing infertile eggs does not require anything but the removal of the rooster from the flock after the need for hatching eggs is past.

Milk is no substitute for meat, for it is not sufficiently concentrated. It is impossible for fowls to drink enough of it to take the place of meat. When fed with animal food, milk performs excellent service.

Infertile eggs are more common among poor layers than good ones. Experiments at the Maine experiment station proved it nearly impossible to get fertile eggs from the hens that were the poorest layers.

DO YOU HAVE DIZZY SPELL

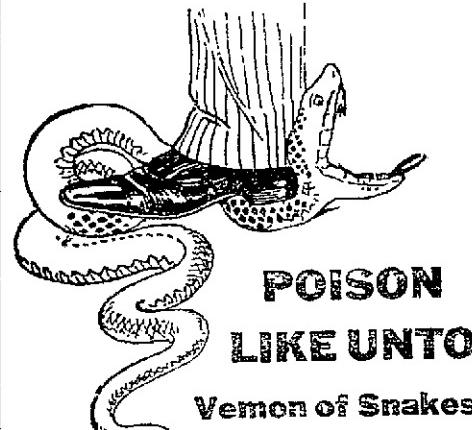

It's Important to Learn the Cause.
As Many Bedford People Have

Dizziness is never a disease of itself—it's only a symptom of some deeper-seated trouble. Much dizziness is caused by disordered kidneys failing to filter all the poisons from the blood. These poisons attack the nerves and dizziness results. If you are subject to dizziness, there is good reason to suspect your kidneys, and if you suffer backache, headache, and irregularity of the kidney secretions, you have further proof. Many Bedford people have learned the value of Doan's Kidney Pills in just such cases. Read this Bedford resident's statement:

Mrs. S. Delaney, W. Penn St., says "Every time I had any trouble with my kidneys I have used Doan's Kidney Pills and they have relieved me in a short time. Frequently I have had bad pains in my back and severe headaches and I would get so dizzy that the room would seem to be going around. At such times just one box of Doan's have driven the trouble away and I consider them a wonderful remedy for kidney complaint."

Price 60c at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Delaney had. Foster—Milburn Co., Mfgs., Buffalo N. Y.

To Shine Isinglass.
Use a flannel rag moistened with vinegar to shine isinglass.

Professor H. Strauss, M. D., of the Royal Charity Hospital, says, "The cause for an attack of gout, rheumatism, lumbago, is supplied by the increase of uric acid in the blood serum, the result of various causes, the most frequent of which is renal. Before an attack, one suffers sometimes from headache, neuralgia, twinges of pain here and there."

When your kidneys feel like lumps of lead, when the back hurts or the urine is cloudy, full of sediment, or you are obliged to seek relief two or three times during the night; when you suffer with sick headache, or dizzy, nervous spells, acid stomach; or you have rheumatic pains or lumbago, gout, sciatica when the weather is bad, do not neglect the warning, but try simple means. Take six or eight glasses of water during the day, then obtain at your nearest drug store 'An-uric' (anti-uric acid).

This is the discovery of Dr. Pierce of the Invalids' Hotel, Buffalo, N. Y. "An-uric" is an antidote for this uric acid poisoning and dissolves uric acid in the body much as hot coffee dissolves sugar. "An-uric" will penetrate into the joints and muscles, and dissolve the poisonous accumulations. It will stamp out toxins.

Send 10 cents to Dr. Pierce's Invalids' Hotel, Buffalo, N. Y. for trial package.

Heat ALL Your House THROUGH ONE REGISTER

Yes, it's just as possible in your home as it has been in fifty thousand others. You, too, may have every room comfortable with balmy healthful heat, reaching every corner by Nature's method of circulation—and all through only one register! It isn't necessary to clutter up your house with pipes, overheat your cellar and incur big bills—not when you can get the

PIPELESS CALORIC FURNACE

The Original Patented Pipeless Furnace

It can be set up in a day, without inconvenience to you, and will make your home so comfortable in the severest winter weather you will be well repaid.

Your house will be uniformly warm; your cellar will be just right for the storage of fruits and vegetables. Your fuel bill will be less than with stoves that heat only a part of your house.

HERE ARE THE REASONS

Caloric is the Original Patented Pipeless Furnace—the result of the study of competent engineers to solve the heating problem. In the most satisfactory way. That they have succeeded is proved by the fact that the number of Calorics sold on an absolute guarantee of satisfaction is three times greater than any other pipeless furnace.

The cause of this satisfaction lies in the patented and exclusive principles that distinguish the Caloric from all others. It is not a pipe furnace provided with an extra section, but a complete revolution in furnace building designed exclusively for pipeless heating.

Come In And See Us

We will show you what these principles are, will tell you what Caloric quality means, why it succeeds and why it insures the best possible results. Then you will be in no danger of being disappointed in later

Get a copy of the book "Progress," which tells about pipeless heating. If you can't come in, write

We Make Good

Peach Tree Grown in Pot.
Recent importations of the United States Bureau of Plant Industry include a pot-grown peach tree from Rev. George Campbell, a South China missionary. A tree only 15 inches tall ripened five good-sized edible clingstone peaches. The plant is said to come true to seed, and it is predicted that fruit growers will develop a remarkable new race of dwarf peaches.

We can also provide
Artistic Printing
of every description.

Why Not Have a Warm Cozy Home This Winter

Install a Jewell Pipeless Furnace

When a Jewell Pipeless Furnace goes into your basement you can rest assured your home is going to be heated better than with your old heating stove, which warms only in spots. You won't be freezing your face while your back is freezing. The Jewell provides a pure, healthful, even heat, both day and night.

When you know the cost of this economical heater you will want one in your home without further delay.

Burns Any Fuel

You will burn little more fuel with a Jewel Pipeless furnace than with stoves, because you receive the full direct action of the heat. It burns hard coal, soft coal or wood—it makes no difference and there is no dirt or muss in the living room to clean up—the firing is all done in the basement. Don't wait. Come in now and look it over.

HARRY L. STERN Bedford, Pa.

Revolutionary Congress.
There was no United States government until after the adoption of the Federal Constitution in 1789, and the congress in existence during the Revolutionary war was the continental congress of the colonies.

Something of an Imputation.

A well-known surgeon was performing an operation on a patient when a fire started at a warehouse across the road, illuminating the whole operating theater. Having finished, the surgeon turned to the nurse and said dryly: "I say, nurse, I notice the patient is coming to. I think you had better draw the blinds. I don't want him to think the operation hasn't been a success!"

Daily Thought.

As a vessel is known by the sound, whether it be cracked or not, so men are proved by their speeches, whether they be wise or foolish—Demosthenes.

Bedford, Pa.

Friday November 21, 1919

Entered at the Post Office at Bedford Pa. as second class matter.

Reorganization of the National Guard of the country was proposed in a bill introduced by Senator Calder. The bill proposes that each State maintain 1,000 men for every representation in Congress from the State under a three year enlistment. A National Guard Bureau is to be established in the War Department.

The Government's experience in operating the telephone and telegraph lines cost \$14,488,237 more than the net earnings. Postmaster General reported to Congress.

The return of the American dead to this country before 1922 has been requested of the French Government by the State Department through Ambassador Hugh Wallace.

DEER-FLY FEVER.

In recent years there has occurred among the rural population of Millard County, Utah, a disease initiated (according to popular belief) by a fly bite on some exposed surface of the body and manifested by the enlargement of the lymph glands which drain the bitten area and by a fever of a septic type lasting from 3 to 6 weeks. The site of the bite becomes tender and inflamed, and they commonly suppurate. There is a marked prostration and the patient is confined to his bed. Probably two dozen cases occurred in Millard County in each of the years 1917, 1918 and 1919. The first case known to have terminated fatally was reported in 1919.

In response to a request from Dr. T. B. Beatty, State Health Commissioner of Utah, to the Surgeon General of the United States Public Health Service for the detail of an officer to investigate this new disease, the writer was directed to proceed to Salt Lake City for the purpose of conferring with Commissioner Beatty and to make study of deer-fly fever. Following a conference with Commissioner Beatty at Salt Lake City on July 23, 1919, and acting upon his recommendation, the writer proceeded to Delta, Utah, for conference with Dr. L. H. Charles.

Dr. Charles was found to be very much interested in the investigation. He took me with him on visits to his patients; put at my disposal the facilities of his office; furnished a place to house laboratory animals, and gave freely of his time and assistance.

The Disease Reproduced in Animals. The first object of the investigation was the reproduction of the disease in animals, in order that animals thus infected might be transported to a well-equipped laboratory for detailed study.

A typical case of deer-fly was selected, and from this case two series of guinea pigs and rabbits were inoculated. The first series was inoculated with the patient's blood; the second series was inoculated with pus obtained from a suppurating cervical gland of the patient.

Cultures. Cultures made on ordinary laboratory media from the lesions of animals dying from the disease were negative; but cultures made upon coagulated egg yolk yielded a growth of small nonmotile coccus bacilli. These cultures reproduced the lesions of the disease in guinea pigs.

Identification. Dr. McCoy in 1911 described in detail a new plague-like disease which he found in the ground squirrels of California. The lesions found in the experimental animals used in this investigation are apparently those of the plague-like disease described by McCoy.

Drs. McCoy and Chaplin in 1912 succeeded for the first time in growing the causative agent of the plague-like disease of rodents. They cultured the organism on coagulated egg yolk and named it *Bacillus tularensis*. The small coccus bacilli mentioned above were isolated from the liver of infected animals.

Having theron erected a two story frame dwelling house, bank barn and other outbuildings.

Both parcels being real estate of which Hattie L. Royer, formerly Hattie Martz, died seized, and which will be offered for sale under Order of Orphans' Court for purpose of distribution to the heirs.

TERMS: 10 per cent cash on day of sale, balance on delivery of deed.

H. M. POORBAUGH

**NOTICE TO SHIPPERS
BY EXPRESS**

Effective December 10, 1919.

The new regulations of the American Railway Express Company handling the Express business of the entire County as agent of the Rail Road Administration provides that all shipments by express weighing over 25 lbs must be packed in wooden containers or cartons of fiberboard pulpboard or corrugated straw material of specified test strengths. Packages weighing over 25 lbs. will not be accepted if only wrapped with paper wrapper nor will ordinary paper boxes wrapped or unwrapped be accepted as suitable protection for these heavier shipments. These regulations do not effect shipments under 25 lbs weight. Never before has the express traffic reached proportions as it has today. Consequently these new regulations are put in force for the purpose of getting shipments into the hands of consignors in good condition thereby removing a vast number of complaints caused by damage owing to shipments not being securely and properly packed.

LIVE STOCK

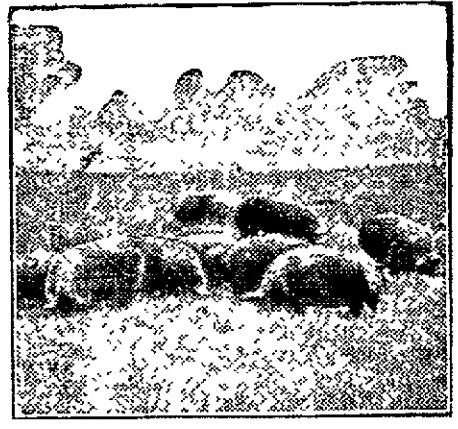

SPECIALIZE IN FEEDER HOGS

One Hundred Carloads of Cholera-free Animals Shipped Annually From South Dakota.

(Prepared by the United States Department of Agriculture.)

Feeder hogs, perfect as to specification and designed to satisfy the most discriminating purchaser, are exported annually from the Belle Fourche reclamation project, South Dakota. Approximately 100 carloads of cholera-free and alfalfa-raised porkers are shipped each season. The output for the last few years has been purchased by Nebraska farmers who fatten and condition the hogs for the central markets. A special advantage about such shipments is that the animals need not be held in quarantine while vaccinated to satisfy the requirements of interstate shipment, and the purchaser does not have to bear added expenses, such as yardage and feed costs, which he would have to pay if he bought his stock hogs on the central market.

The Belle Fourche project was recently declared free from cholera by

Dakota Farmers Specialize in Feeder Hog Production.

The state live stock sanitary board. The hog growers of that section have decided it is most profitable for them to produce feeder hogs because the high price and limited quantity of corn in their country available for feeding purposes make the feeding of hogs a hazard. The cost of raising hogs is high, but the profit is handsome.

More than 100 Government Savings Associations Now Active in the Third Federal Reserve District.

More than 100 Government Savings Associations are now operating in the Pennsylvania, New Jersey and Delaware counties of the Third Federal Reserve District. These associations are located in business and industrial concerns and have a total membership of over 200,000.

The members are regularly saving and investing through the purchase of Government Thrift and Savings Stamps. The largest of these associations has several thousand members and its total investment at a single point runs from \$3000 to \$4000.

The Government Savings Association plan is a very simple one. It is designed to make saving an easy and convenient process and for that reason is meeting with great favor among workers. There are no dues, no fines, no meetings, and no record is kept of individual accounts.

The ease of saving by the method now introduced goes far to institute thrift as a permanent habit and the returns in various plants show that many workers who previously were very improvident are methodically and regularly putting by considerable sums.

In one small concern eleven men were interested in the plan and it was figured that in six months they were likely to save about \$175. They actually saved more than \$2000 in that time, as much to their own as to others' surprise, and two of them bought homes, using their investment in Government Savings Stamps to make the initial payments.

The War Savings Division, with headquarters at 1431 Walnut street, Philadelphia, is introducing the association plan into practically all leading business and it is meeting with the commendation of both the employers and the employees. Literature relating to the plan and suggestions to promote its introduction in any line of business are obtainable upon request.

KEEP BEEF CALVES GROWING

Ensilage, if Available, Is Best and Cheapest Feed When Pastures Have Become Short.

(Prepared by the United States Department of Agriculture.)

Beef calves on pasture should be kept in a thrifty, growing condition. If the pasture becomes short the cows should be fed, otherwise the development of the calves may be checked. Haylage, if available, is the cheapest and best feed. Good hay is an excellent supplementary feed, and cows, even on a fairly good pasture, seem to relish a small quantity of dry feed. Soy beans, cow peas, or other pasture crops may be used. If it is not practicable to supply supplementary feeds to the cows the calves should be fed a little grain. This can be done easily by placing a small quantity in a creep in the pasture. A mixture of one-third corn, one-third oats, and one-third bran by weight is a good feed for this purpose.

LODGES THINK WELL OF NEW SECURITY

Many Orders Investing Fund in Quick Redemactable Treasury Saving Certificates.

NEW TAX ACT IS NOW PRODUCING

State Will Have Over \$7,000,000 of Inheritance Taxes This Year

FISCAL YEAR CLOSES NOV. 30

Interesting News Items, Briefly Condensed, Picked Up at the Departments, Which Are of Interest to the People of the State.

Harrisburg, Pa.—First payments to be made by Auditor General Charles A. Snyder of collections under the new non-resident transfer inheritance tax under the act of 1919 have just been turned into the State Treasury. They amount to \$3,909.72 and mark the beginning of tax payments which it is believed will run into millions of dollars annually and take the place of the direct and collateral inheritance taxes to a great extent.

The transfer inheritance tax is collected on all property within Pennsylvania and belonging to a non-resident at time of death. Heretofore, under the inheritance tax acts, the personal property of a non-resident decedent was exempt. The Auditor General has called attention to the fact that the act provides that no corporation or national bank within this State may transfer any stock belonging to an estate of a decedent unless a certificate showing payment of the tax has been given by the Auditor General under penalty of being liable for the tax and a fine of \$1,000.

Treasury Savings Certificates are issued in the denominations of \$100 and \$1000. Any sum up to \$1000 can be invested by a lodge in one year. The certificates are being sold in October at the rate of \$84.20 per \$100. If held until January 1, 1924, they will be redeemed at full face value, \$100, or multiples thereof. Should a lodge need its money back at any time, its certificates will be redeemed upon 10 days' notice at full cost price plus 3 per cent interest. The value and interest are guaranteed by the United States Government. They are not subject to collection.

300,000 Maxwells

How they created a demand for the Post-War Maxwell that cannot be fulfilled

THERE is a demand for the Post-War Maxwell that eight great plants cannot fill.

More than 40,000 persons who set their minds on having one will have to go without.

The cause for this is due largely to the magnificent performance of the 300,000 previous Maxwells.

They delivered such excellent mileage at such low cost that the great American public learned to know this car.

This unprecedented demand is evidence of its deep rooted appreciation. Then when the Post-War Maxwell came out, with its score or more of refinements and improvements developed during the war, the demand for Maxwell reached a new peak.

100,000 are being built during the current year. 40,000 more readily could be marketed.

Thousands are priding themselves on possessing one of these Post-War models; thousands more will have their hopes filled; thousands will have to go without.

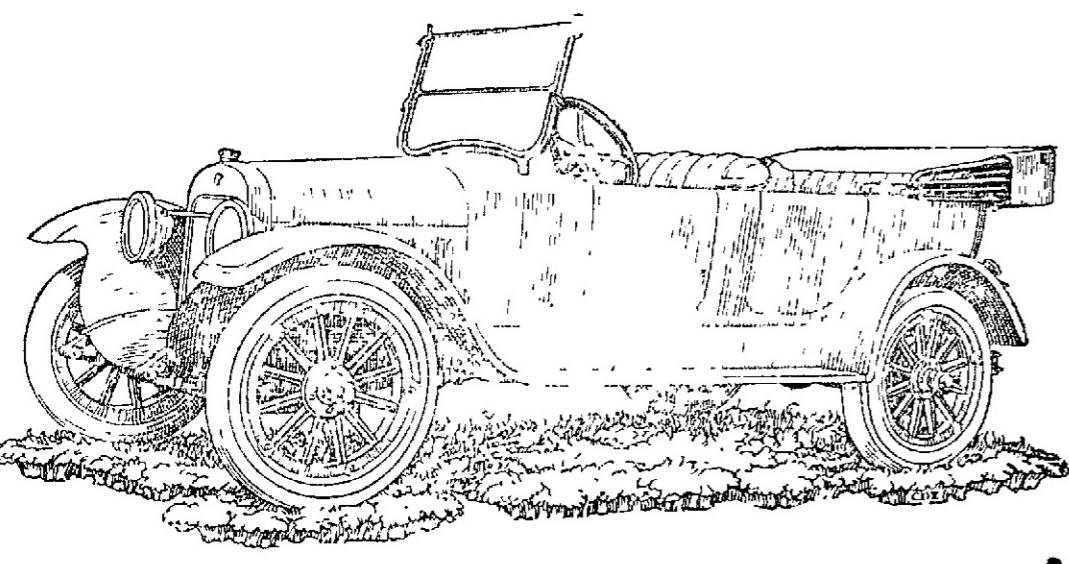

Which class will you be in?

Price, \$985 f.o.b. Detroit

WHEN YOU SUFFER FROM RHEUMATISM

Almost any man will tell you that Sloan's Liniment means relief

For practically every man has used it who has suffered from rheumatic aches, soreness of muscles, stiffness of joints, the results of weather exposure. Women, too, by the hundreds of thousands, use it for relieving neuritis of lame backs, neuralgia, sick headache. Clean, refreshing, soothing, economical, quickly effective. Say "Sloan's Liniment" to your druggist. Get it today. 35c, 70c, \$1.40

Sloan's Liniment
Keep it handy

BAD COLD GOT YOU? FEELING GRIPPY?

Dr. King's New Discovery soon starts you on the road to recovery

ONCE tried, always used. That's a trite expression, but one never more applicable than it is to Dr. King's New Discovery.

You will like the prompt, business-like way it loosens the phlegm-congested chest, soothes the tortured throat, relieves an old or a new cold, grippe, cough, croup.

The kiddies can take it in perfect safety, too. No bad after-effects. Standard half a century, 60c, and \$1.20 a bottle. At your druggist.

Don't Continue Constipated

Don't let your bowels bulldoze your system. Make them function regularly—keep the body cleansed of waste matter with Dr. King's New Life Pills.

Biliousness, sick headache, sour stomach, indigestion, dizziness, furred tongue, bad breath—think of the embarrassments and discomforts traceable to constipation. How easily they're rectified by the occasional use of Dr. King's New Life Pills. Move the bowels smoothly but surely. Try them tonight. All druggists—25c, as usual

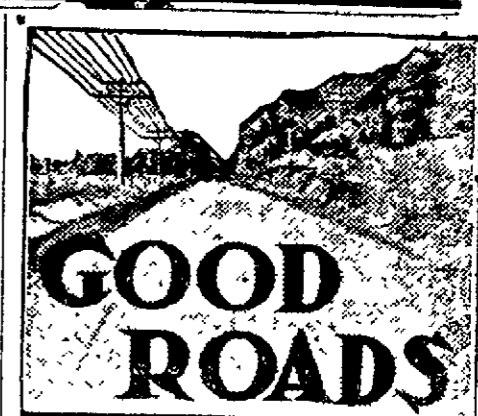

Cloth From Pineapples.

Aside from its edible qualities the pineapple is little known in this country, says Popular Mechanics Magazine. In China, however, it is especially cultivated for the use of the leaves in making cloth. The fiber is extracted from the leaves by a simple process and made into thread. It is then run on bobbins and spools and is ready for weaving, the old native looms being employed.

Funnel Made From Milk Bottle.
A funnel that has a wide range of application about the household, and especially in food-canning season, may be made by cutting the body of an ordinary milk bottle. The bottle is trimmed at the desired point by tying an alcohol-saturated cord around it and applying a match. The glass will break evenly at that point. After breaking, the edge is smoothed off on an emery wheel and the funnel is ready for use.

Fiction Concerning Sargossa Sea.

The Sargossa sea in the north Atlantic is an area through which no ocean currents pass. It is comparatively still water, forming a sort of eddy into which seaweed tends to drift. Writers of fiction have held that the dead ships of the ages have found resting places in this eddy and have peopled them with the spirits of lost mariners. The idea is pure fiction. The Sargossa sea may be navigated without experiencing any difficulty with seaweed and without seeing a derelict.

GOOD ROADS

CONSTRUCTION OF GOOD ROAD

Concrete Highway Is Composed of Mixture of Sand, Stone, Portland Cement and Water.

The concrete road is composed of a carefully proportioned mixture of clean, hard, well-graded sand, pebbles or broken stone, portland cement and water. This mixture is laid upon the subgrade to a depth of 7 inches or more for the entire width of the road, and soon hardens into a mass as hard as rock. The materials are bonded together by the cement so firmly that it is impossible for traffic to loosen or separate the particles. For this reason no expensive maintenance is required.

The foundation or subgrade is compacted where the concrete is to be laid and the roadbed is drained so that no water will remain under the slab, writes A. L. Pettibone in Dakota Farmer. Upon the foundation, concrete is laid in one or two courses. A one-course concrete road consists of a relatively rich concrete mixture throughout. A two-course road consists of a somewhat leaner mixture for a base with a richer top or wearing course, applied before the concrete in the base has begun to harden. Frequently re-enforcement in the form of wire fabric or steel rods is embedded in the concrete. This assists to prevent cracks in the slab and aids in keeping cracks which may form from opening to any appreciable extent.

The high wearing quality of the concrete road results from using properly graded, clean, hard sand and pebbles or crushed rock. These must be combined with portland cement in carefully measured proportions, mixed with a power-operated batch mixer to produce a stiff plastic consistency, then placed upon the foundation and struck off with a template or strike board, so shaped that the surface of the pavement will have the desired crown. After rolling with a light metal roller to compact the concrete and remove excess water used in mixing, the concrete is finished by sawing a series of rubber or canvas belts along

An Improved Highway in West

the pavement, leaving a true, even, gritty, dense surface. When sufficiently hardened to prevent pitting or marking, the surface is sprinkled with water, then covered with 2 inches or more of moist sand or earth, which is kept wet by sprinkling for ten days to two weeks to prevent concrete from drying out too rapidly. Under no circumstances should a concrete road be put in use until it is 18 days old and in cool weather a longer time is necessary. This is a brief summary of the essentials of the construction of a concrete road.

GOOD ROADS ARE PROFITABLE

Authorities Should Act to Meet Growing Demands Before Trade Goes Other Ways.

Good roads are a paying investment. Local authorities in cities, towns and counties should act without delay to meet the growing national and local demands before trade goes in other directions. It is almost impossible to get back the lost advantage after other districts have won it.

NOT AFFECTION BY WEATHER

Heat or Cold, Freezing and Thawing Does Not injure Concrete Once It is Hardened.

Concrete roads are not affected by heat or cold nor by freezing or thawing when it is once hardened. Other materials tracked upon concrete have no effect upon it. Heat does not soften the binder permitting it to flow; cold does not make it brittle, causing it to chip.

Proper Grade of Road.
The grade of the road is important, for on this depends the weight of the load which can be hauled economically.

Improvement in Texas.
Texas this year will spend a total of \$76,216,000 on improved highways according to figures compiled by the state highway department.

Building Roads Is Important.
The building of good roads is of the greatest importance to a community.

A THANKSGIVING SALE

NOVEMBER 20 to 29th

THE purchasing power of Bedford County's Biggest Store was never before so clearly demonstrated as in this event of wonderful savings for you. WHY--when you carefully consider the value of the goods offered and the prices asked it will remind you of the GOOD OLD TIMES OF LOW PRICES, and you will want to come to town and stock up in the GOOD OLD FASHIONED WAY with enough of these goods to last you all winter, and if you do you will surely have something for which to be thankful on THANKSGIVING DAY, for after this sale these prices can not be duplicated by us or anyone else this winter.

We have large quantities of every item offered, but we would advise you to buy early as we expect the whole county to participate in this money saving event. Stocks may not last for the entire sale. COME EARLY. Bring the wife and the kiddies.
